Diego Nicolás Ramírez Maldonado

Backend Software Engineer · Python & Node.js · REST APIs & microservices · PostgreSQL · AWS

dieramirezma.dev@gmail.com | Bogotá | dieramirezma | github.com/dieramirezma | dieramirezma.dev

Software Engineer with nearly 3 years building production software, focused on **backend development with Python** (Django REST Framework, FastAPI, Flask) and **Node.js**. At Dapper I work on a **B2B SaaS** platform used in **10+ Latin American markets**: **REST APIs** and **distributed services** over **PostgreSQL**, deployed on **AWS** (ECS Fargate, RDS, S3, Lambda) and Google Cloud with **Docker**, plus production debugging, log analysis and deployments. Strong focus on quality, with **100+ automated tests** (∼97% line coverage) running in **GitHub Actions CI/CD**. Full-stack background with React/Next.js and TypeScript. Native Spanish, professional working English.

EXPERIENCE

Software Engineer (Backend / Full-Stack)
Jan 2025 – Present

Dapper S.A.S. — regulatory intelligence & public affairs SaaS
Bogotá, Colombia

Platform used in 10+ Latin American markets; work across backend, databases, cloud, testing, CI/CD and frontend.

- Build and evolve **REST API** endpoints and services in **Python** (**Django REST Framework**, **FastAPI**) over **PostgreSQL**: data models, ORM relations and queries, business logic, authentication and permissions, file uploads and storage, in a **distributed / microservices** architecture; also work with **Node.js**.
- **Social-listening microservices**: FastAPI services on **Cloud Run** that use **Gemini** to generate queries and score relevance and sentiment, extract data with **Apify**, then filter, aggregate and persist results in PostgreSQL to power product reports, with usage and **cost telemetry**.
- Operate cloud infrastructure on **AWS**: **ECS Fargate** task definitions and execution roles, **ECR**, **RDS**, **S3** presigned URLs, **Lambda**, ElastiCache, Security Groups, **IAM** and **Secrets Manager**; plus Google Cloud (Cloud Run, Cloud Storage, Secret Manager, service accounts). **Docker** images and deployments.
- **Production debugging**: log analysis, IAM/AccessDenied issues, container and task diagnosis with ECS execute-command, failed deployments and frontend–backend integration problems.
- Implemented and maintain **100+ automated tests** (Vitest, React Testing Library) in **GitHub Actions CI/CD**, reaching ∼**97% line**, 95% function and 92% branch coverage.
- Led, in about **one month**, the consolidation of **3 country-specific applications** into a single **multi-country architecture** driven by configuration and **feature flags**; it helped the platform grow from **3 to 10+ markets in ∼6 months**.
- Frontend features with **React**, **Next.js 14** and **TypeScript**, with **type-safe REST integrations** generated with Orval (TanStack Query) and auth with NextAuth/JWT.

Freelance Full-Stack Developer
Jan 2024 – Present

Small businesses
Remote

Web applications delivered end to end, from requirements to deployment: **Django** REST backends, **PostgreSQL** data modeling, API integrations and Next.js/Astro frontends.

- **Dulce Berlín**: e-commerce with a **Django** + PostgreSQL backend and Next.js frontend; **Wompi** payment integration with **webhooks**, payment-state handling and refund flows.

PROJECTS

FullStyle — Full-Stack Developer
2024 – 2025

University team project
Flask, PostgreSQL, Docker, Next.js

E-commerce platform: **Flask** REST APIs over **PostgreSQL**, containerized with **Docker**, and a Next.js (TypeScript) frontend; Wompi payments with webhooks, refunds and cancellations; security with **Google OAuth**, **2FA** and CAPTCHA.

- **Gemalab Hackathon 2024 — 1st place**: plant life-cycle traceability platform with authentication and secure data flow, built with an interdisciplinary team.
- **FoodRadar** (2025): academic Android app in **Kotlin** with OpenStreetMap and **Gemini AI**, team of 4.

SKILLS

- **Backend**: Python (Django, Django REST Framework, FastAPI, Flask), Node.js, REST APIs, microservices, webhooks, JWT, OAuth
- **Databases**: PostgreSQL, MySQL, SQL, ORM
- **Cloud & DevOps**: AWS (ECS Fargate, ECR, RDS, S3, Lambda, ElastiCache, IAM, Secrets Manager), Google Cloud (Cloud Run, Cloud Storage), Docker, GitHub Actions, CI/CD, Git
- **Testing & Quality**: automated testing, Vitest, React Testing Library, coverage in CI
- **Frontend**: TypeScript, JavaScript, React, Next.js, TanStack Query, Tailwind CSS
- **Other**: production debugging, log analysis, secrets and permissions management, feature flags, Gemini, Apify
- **Languages**: Spanish (Native), English (Professional working proficiency)

EDUCATION

Universidad Nacional de Colombia
Completed 2026 — GPA 4.5/5.0

BSc in Systems and Computing Engineering
Bogotá, Colombia

Certifications: Software Architecture & Quality Diploma (UNAL) • AWS Academy Cloud Foundations • GitHub Foundations
